AD Premixed™ & AD 25 Gel™

AD Premixed is used to replace broken and missing plaster keys and to fill voids where shrinkage is not a critical issue. AD Premixed is based on the original Morgan Phillips formula, conveniently packaged in an easy to use 30 oz. (900 ml) caulking cartridge.

AD 25 Gel is used to re-adhere plaster in small, tight and difficult to access locations. The product's thixotropic* properties make it ideal for injection into fine cracks and crevices. AD 25 Gel is also effective at securing metal or wood pins used to reinforce plaster. Application with special injection gun (purchased separately from HPCS).

**A thixotropic material is in the form of a gel under normal conditions but liquefies under pressure. This enables it to find and consolidate remote cracks and crevices.*
