

GR Non-Shrink
Premium Plain Face Plaster Grout

After consolidation, **GR Non-Shrink** grout is used to fill in any space that exists between plaster and substrate. **GR Non-Shrink** is essential in situations where the stress of shrinkage will produce alligator cracks in delicate plaster – an important consideration where surface decoration is present.

Although **GR Non-Shrink** is based on the original Morgan Phillips formula for re-attaching plaster, important improvements have been made and both the HPCS formula and mixing cartridge are patent pending. Each case of **GR Non-Shrink** comes with a reusable single cartridge mixing wand. For large projects an HPCS multi-cartridge mixing machine is available.

For professional use only
Not for resale
See MSDS before use

Fully coalesces within 24 hours
Clean tools after use
Wash up with warm soapy water

Conveniently packaged in 30 oz (800 ml) cartridge
25 cartridges per case

Store in a cool dry place
Shelf life of 6 months from delivery date

For best results, use within 2 hours after mixing within cartridge

Manufactured under ISO 9001 standard
Made in Canada
